RE: Wolf Road Street Construction – Phase 2

Dear Resident,

IDOT's contractor for the Wolf Rd. project is scheduled to begin Phase 2 of the Wolf Rd construction project on **Monday October 25th**.

The scope of the work associated with this phase of construction will be removal of the temporary asphalt roadway that was utilized for the northbound traffic during Phase 1 of construction. This pavement removal is only going to take place north of Dundee Rd. In addition to this pavement removal there will be storm sewer and water main installation along this corridor of Wolf Road. This work will continue until the weather prevents construction activities from proceeding.

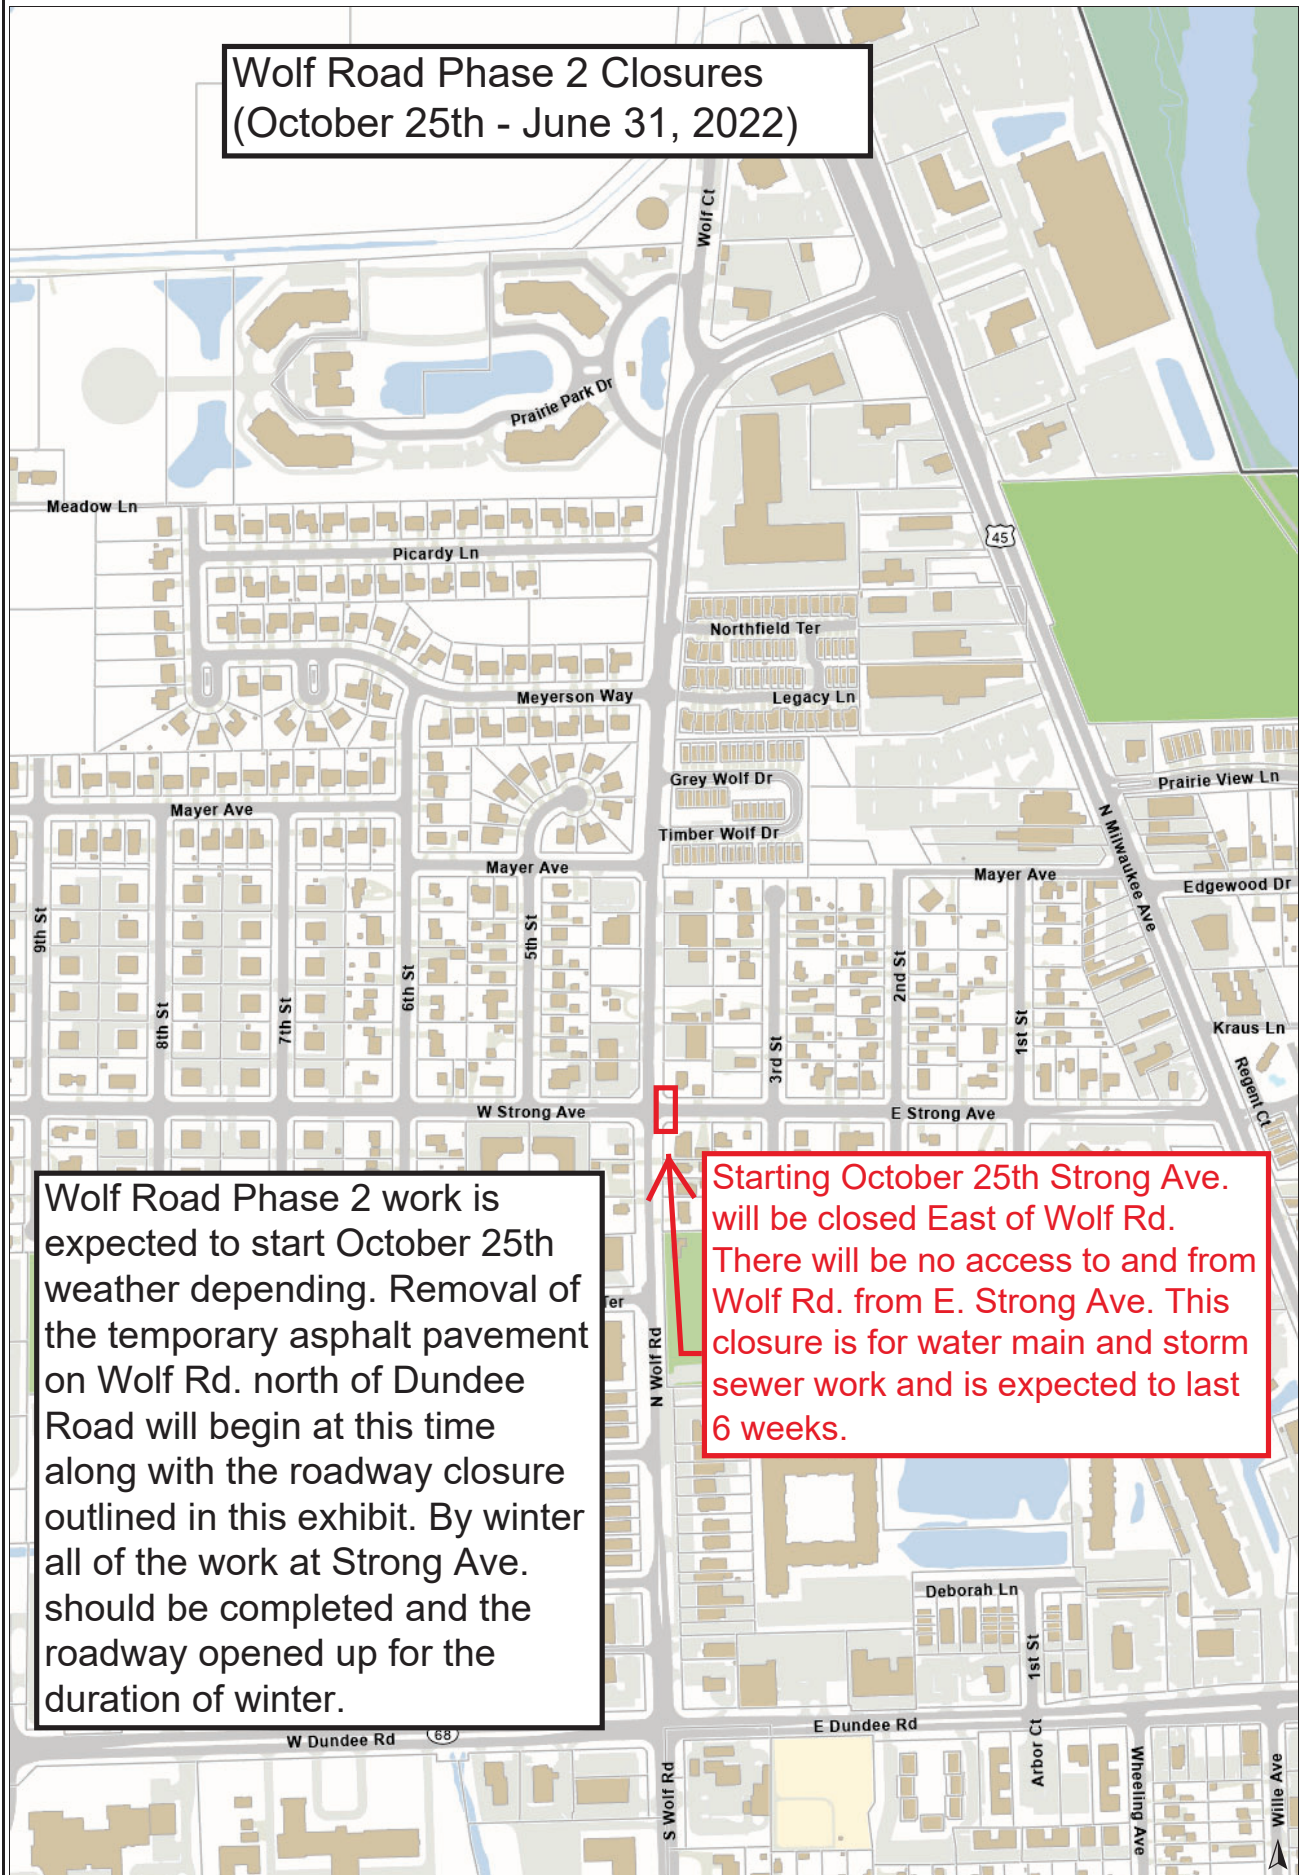

Access to your home/business will still be maintained during this construction phase. Temporary driveways will be provided and maintained through the winter. The home/business owner will still be responsible for shoveling their driveway.

All questions related to this project should be directed to IDOT's contact number 630-816-5940. All other inquiries can be brought to the attention of the Village's Engineering Division at 847-279-6910. Please see exhibit on the reverse side of this notice for more detail. We will make every attempt to keep you informed during this project.

Thank you for your patience,

The Village of Wheeling

**Wolf Road Phase 2 Closures
(October 25th - June 31, 2022)**

Wolf Road Phase 2 work is expected to start October 25th weather depending. Removal of the temporary asphalt pavement on Wolf Rd. north of Dundee Road will begin at this time along with the roadway closure outlined in this exhibit. By winter all of the work at Strong Ave. should be completed and the roadway opened up for the duration of winter.

Starting October 25th Strong Ave. will be closed East of Wolf Rd. There will be no access to and from Wolf Rd. from E. Strong Ave. This closure is for water main and storm sewer work and is expected to last 6 weeks.
